

PRESS RELEASE

Caterease Summer in Full Swing

For Immediate Release
Wednesday, June 30, 2004

Naples, Florida –

Caterease Catering and Event Management Software is once again celebrating summer with its popular “Tropical Drink Training” classes at its home office in Naples, Florida. Billed as “a training class between tropical sunset drinks”, the monthly, two-day class has been a summer tradition at Caterease for several years.

“Summer is the perfect time to hold these classes,” says Chris Kopriva, Caterease Director of Training. “Since it’s off-season, hotels are less expensive and more accessible. And in the late afternoon when class is over, the weather is perfect for a warm walk on the beach or a swim in the Gulf of Mexico – with plenty of time to relax over a frozen drink and watch the sun sink into the water. It really is like no other place in the country.”

“If you’ve never been to Naples,” says Chris Watson, Caterease Technical Consultant, “then you owe it to yourself to come. This city has all the luxury and sophistication of South Beach, but with a carefree, ‘Margaritaville’ charm. For years, Naples has been recognized for its fine dining, breath-taking beaches and fun, energetic nightlife.”

The Caterease two-day training class offers comprehensive instruction on the entire state-of-the-art program. Topics covered range from basic data-entry processes to advanced features such as query tools and custom data reporting and management. An optional third day is often offered covering even more advanced program features. Currently scheduled summer classes include a two-day class July 22-23, and two-day classes with optional third day on August 18-20 and September 15-17.

“Summer classes here are my favorites out of all the classes we do,” comments Kopriva. “The information students get is invaluable in helping them get the most out of their programs, and the atmosphere is always very relaxed and conducive to learning.”

Sunsets, swims and strolls along the sand. Learning should always be this much fun.
