# **Caterease Software Announces Improved Guestrooms Management Component**

For Immediate Release  
Wednesday, October 6, 2004

### **Naples, Florida –**

Caterease Catering and Event Management Software announced this month that it has released a powerful new upgrade to the guestrooms management component of its program.

The Caterease Guestrooms Manager is used by many hotels, motels, inns and bed and breakfast establishments to manage group sleeping room bookings, while other components in Caterease manage catered events. In the Guestroom Manager, sleeping room contracts can be created in conjunction with existing events or as independent bookings, and can be tracked using a number of flexible reports, queries and inventory settings.

The impressive new upgrade, however, adds a host of additional functionality to this already popular part of the program. For example, users can now redesign their Guestroom Manager screens to allow for tracking of sleeping rooms in various ways for each contract – the number of rooms originally negotiated with the client, the number of rooms reserved, an additional adjusted number and finally the number actually used. In addition, a detailed rooming list can now be created for each group room booking, and the printed contract offers much more flexibility.

“This upgrade is a huge step forward for our Guestroom Manager users,” says Caterease Director of Training Chris Kopriva. “As with every upgrade, we are responding directly to customer requests, and the result is a more powerful and more appealing product.”

The new features offer Caterease even more appeal to hotels and other facilities whose needs go beyond event management, according to Kopriva.

“Obviously Caterease is primarily an event management program,” Kopriva notes, “and we lead the industry in that respect. Now those businesses who are also concerned about group room bookings and tracking their sleeping rooms will be extremely impressed with the diversity of the program.”

While Caterease has long been renowned for offering more features and an easier design than any other event management program, this new upgrade extends that reputation to guestroom management as well, Kopriva says.

“We’ve had a Guestroom Management feature for years,” he explains, “and this new upgrade has improved its functionality immensely. Every feature a hotel or motel could want is now available, and – as with everything else in Caterase – incredibly easy to use.”

### **About Caterease Software**

Caterease Software, developed by Horizon Business Services, Inc., is a comprehensive event management program unparalleled in the hospitality industry. For more than a decade, event management professionals of all sizes – from independent restaurants and caterers to large hotel chains and conference centers – have come to rely on the power and user-friendliness that Caterease is known for.

Designed in conjunction with experts in the hospitality industry, Caterease offers the perfect blend of essential features and an attractive, easy-to-use layout. With more flexibility than any other software, Caterease even allows the end user to redesign the program to perfectly fit his or her specific business needs. Caterease is truly automation made easy, and is the ideal solution for the hectic world of catering and event management.
